## UNIT 8:

### NATURALLY DERIVED MATERIALS FOR THE PERFUMER

**16 Credits**

**160 Learning Hours**

**Unit Fee**

*IFEAT Members: £1,100*

*Non-Members: £1,350*

**Apply Here**

*icats.education*

### Unit Overview

In this unit, you will explore the diverse range of naturally derived materials available to perfumers. You will learn about the sourcing, characteristics, and applications of these ingredients, enhancing your ability to create unique and captivating fragrances. This unit covers the origin and types of natural materials, regulatory considerations, and a deep dive into fragrance families. Equip yourself with the skills to innovate and excel in the global perfumery industry with this comprehensive and professionally focused unit.

# UNIT 8:

## NATURALLY DERIVED MATERIALS FOR THE PERFUMER

### What's included?

## Unit Aims

By the end of the unit you will be able to:

- Understand the sourcing, characteristics, and regulatory considerations of naturally derived materials used in perfumery
- Analyse the diverse range of natural ingredients by origin, type, and fragrance family to enhance fragrance formulation skills
- Evaluate the applications and creative potential of naturally derived materials in developing unique and captivating fragrances

## UNIT LEARNING OUTCOMES

Demonstrate a thorough understanding of the various naturally derived raw materials, including their sourcing, characteristics, and production processes

Critically assess the regulatory frameworks affecting natural products, such as CITES and the Nagoya Protocol, and their implications for the perfumery industry

Develop skills in organising and categorising natural ingredients by origin, type, and fragrance family to inform and inspire creative perfumery

Apply knowledge of the chemical constituents, odour profiles, and processing information of natural materials to create high-quality, innovative fragrances

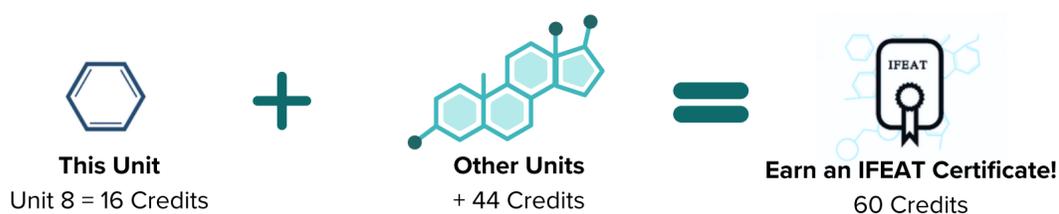

Enhance professional expertise in the use of naturally derived materials, considering socio-economic and geographic factors, to meet industry standards and consumer preferences

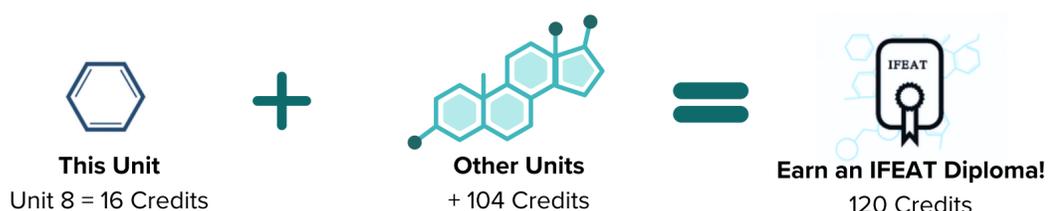

Synthesise information from various sources to effectively evaluate and utilise natural ingredients in the formulation of unique and captivating fragrances

## Combine units for an IFEAT Certificate

## Combine units for an IFEAT Diploma
