

IFEAT ACADEMY

UNIT 7:

KEY OPERATIONS AND CHEMICAL PROCESSES FOR SYNTHETICS

8 Credits

80 Learning Hours

Unit Fee

IFEAT Members: £540

Non-Members: £680

Unit Overview

In this unit, you will gain insight into the production of synthetically produced aromatic materials. You will explore modern chemical processes and operations used to create synthetic materials, ensuring consistency, sustainability, and innovation in formulation. This unit covers basic chemistry concepts, chemical production techniques, and advanced analytical methods, providing a comprehensive understanding essential for professionals in the aroma trades. Equip yourself with the skills to innovate and excel in the global market with this in-depth, professionally focused unit.

UNIT 7:

KEY OPERATIONS AND CHEMICAL PROCESSES FOR SYNTHETICS

What's included?

Unit Aims

By the end of the unit you will be able to:

- Understand the key operations and chemical processes involved in the production of synthetic aromatic materials
- Analyse modern chemical production techniques, focusing on sustainability and green chemistry
- Evaluate the role of analytical techniques in ensuring the quality and consistency of synthetic aromatic materials

UNIT LEARNING OUTCOMES

Demonstrate a thorough understanding of basic chemistry concepts and their application in the production of synthetic aromatic materials

Critically evaluate various chemical production techniques, including petrochemicals, biotech, and green chemistry, for their effectiveness and sustainability

Develop skills in selecting and optimising chemical processes to create consistent and innovative synthetic formulations

Apply practical knowledge of distillation, chromatography, and other chemical processes to produce high-quality synthetic aromatic materials

Enhance professional capabilities in utilising advanced analytical techniques to ensure the quality and stability of synthetic products in the aroma trades

Synthesise information from various chemical and analytical processes to innovate and improve synthetic product development in the fragrance and flavour industry

Combine units for an IFEAT Certificate

Combine units for an IFEAT Diploma
